

SLW SMALL GRAINS

3-way Proprietary Mix

- Economical forage mix
- Great to top seed into perennial clovers
- Easier weed management due to “all-grass” mix (contact local retailer for recommendations)
- Different grains provide forage at different times of the cool season - wheat, oats, triticale

Planting Date: September to November

Planting Rate: 80-120 lbs. per acre

Planting Depth: 1/4 to 1 1/2 inch

Preferred Soil Type: All, well-drained

Game Species: Deer-Turkey-Quail

**Pairs well with our Clover Blend for more plot variety and coverage.*
