MIXON SEED

WILDLIFE SEED®

Bring your land to life.

Hunting in the South represents generations of proud tradition. It's why Mixon Seed Service created a brand devoted to safeguarding this time honored culture.

From weekend hunters to exclusive sporting plantations, SouthLand Wildlife Seed is the premier option for anyone interested in high-quality wildlife seed.

Our portfolio consists of proprietary mixes and blends, custom mixes, and key, single crops. Each are nutrient-rich wildlife food sources that are also good for the environment and your land.

You can rely on our range of products, which have been selected specifically for the Southeast, to keep growing your legacy.

A photograph of a herd of deer grazing in a field. In the foreground, three deer are visible, with one larger buck on the right and two smaller does on the left. They are all facing right and appear to be eating grass. The background consists of tall green grass and a dense line of trees with green and some autumn-colored leaves. The lighting suggests it might be late afternoon or early morning, with a warm glow.

MAXIMIZE YEAR-ROUND HERD NUTRITION

Providing year-round, high-quality supplemental forage is important to maximizing herd nutrition with food sources, especially during the harsher summer and winter months. Our primary food plot program features three mixes you can plant from spring through early winter.

SPRING SIGNATURE MIX

Plant in Spring after danger of frost has passed

- Soybeans, Cowpeas, Sunflowers, Buckwheat, Sorghum
- Warm-season “catch-all” when it comes to target species and primarily provides great forage options for deer
- Legumes in this mix provide great sources of nitrogen in the soil

ULTIMATE PROTEIN MIX

Plant from June to early August

- Soybeans, Cowpeas, Lab Lab, Sunn Hemp
- Indeterminate soybeans will have vegetative regrowth as long as the main node has not been browsed down
- Provides high levels of protein and nutrients for antler regrowth and milk production during nutritional stress in the summer

FALL SIGNATURE MIX

Plant from September on after soil temperatures begin to drop

- Triticale, Wheat, Oats, Clover, Rape, Radish, Winter Peas
- Cool-season “catch-all” when it comes to target species and primarily provides great forage options for deer
- With a mix of small grains, brassicas, and legumes this mix provides great soil health benefits in addition to forage

SPRING/SUMMER

SPRING SIGNATURE MIX

Soybeans, Cowpeas, Sunflowers, Buckwheat, Sorghum

Well-rounded mix for all wildlife species that provides balanced nutrition during the spring and summer months. Great variety of seed with staggering maturities to prolong your plot. Produces well on all soil types.

PLANTING DATE: April - June

*PLANTING RATE: 40 lbs./acre - 60 lbs./acre

TARGET SPECIES: All

ULTIMATE PROTEIN MIX

Soybeans, Cowpeas, Lab Lab, Sunn Hemp

An annual warm-season mix designed for overall animal health by providing high-quality, digestible protein options. High protein levels from this mix provide nutrition during periods of antler regrowth and milk production, especially during the harsh summer weather.

PLANTING DATE: Mid-April - July

*PLANTING RATE: 40 lbs./acre - 60 lbs./acre

TARGET SPECIES: Deer, Turkey

UPLAND BIRD MIX

Millets, Sorghum, Sesame, Egyptian Wheat

The variety in this mix maximizes seed production at different times throughout the year. Egyptian Wheat adds diversity and provides shelter and cover for small game birds. Great mix for dove fields if planted early enough to mature by season opening.

PLANTING DATE: Mid-April - Early June

*PLANTING RATE: 20 lbs./acre - 40 lbs./acre

TARGET SPECIES: Dove, Pheasant, Quail, Turkey

WATERFOWL BUFFET MIX

Millets, Sorghum, Buckwheat

Great addition to a moist soil duck management strategy, with better stalk strength and stalk height to withstand flooding. Variety of grains with staggering maturities to provide ample forage and create habitat for insects important to waterfowl nutrition.

PLANTING DATE: Mid April - August

***PLANTING RATE:** 15 lbs./acre - 25 lbs./acre

TARGET SPECIES: Waterfowl, also great for deer and upland birds

WATERFOWL RICE BLEND

Conventional and Carolina/Charleston Gold Rice

Rice blend with differing heights and maturities to prolong forage availability. This blend can be planted in dryland, or in a shallow flood up to 12 inches. Does not like brackish or salt water.

PLANTING DATE: April - Early June

***PLANTING RATE:** 80 lbs./acre - 120 lbs./acre

TARGET SPECIES: Waterfowl

OTHER KEY SINGLE SPECIES OFFERINGS

Forage Soybeans: Deer, Turkey

Cowpeas: Deer, Quail, Turkey

Chufa: Turkey, Deer, Waterfowl

Sunflowers: Dove, Deer

Millets: Dove, Waterfowl, Quail, Turkey

Rice: Waterfowl

***If you are drilling or using a planter, refer to the lower end of the recommended planting rate. If you are broadcasting or top sowing, refer to the higher end of the planting rate.**

FALL/WINTER

FALL SIGNATURE MIX

Triticale, Wheat, Oats, Clover, Rape, Radish, Winter Peas

Well-rounded mix of seed for all wildlife species that provides balanced nutrition during the fall and winter months. Great variety of seed with staggering maturities to prolong your plot. Produces well on all soil types.

PLANTING DATE: September - November
*PLANTING RATE: 40 lbs./acre - 60 lbs./acre
TARGET SPECIES: All

FALL CLOVER BLEND

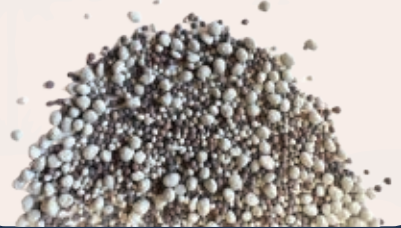

Crimson, Ladino, Balansa, Berseem, Arrowleaf Clover

Blend of annual and perennial clovers with a range of maturities for prolonged browsing during the season. All seeds are coated and inoculated to enhance germination and vigor. Pairs well with our Small Grains Mix for more plot variety and coverage.

PLANTING DATE: September - November
*PLANTING RATE: 20 lbs./acre - 30 lbs./acre
TARGET SPECIES: Deer, Turkey

RTR BRASSICA MIX

Radish, Turnips, Rape

Annual brassica forage mix great for providing forage biomass during the fall and winter and enhancing soil. High in protein and nutrients needed during the fall and winter months, especially during the rut.

PLANTING DATE: September - October
*PLANTING RATE: 6 lbs./acre - 8 lbs./acre
TARGET SPECIES: Deer

SMALL GRAINS MIX

Oats, Wheat, Triticale

Economical forage mix with different grains providing forage at different times throughout the season. Great to top seed into perennial clovers or our Fall Clover Blend. Cereal grains provide a good source of nutrition when natural forage declines during fall/winter.

PLANTING DATE: September - November
***PLANTING RATE:** 80 lbs./acre - 120 lbs./acre
TARGET SPECIES: Deer, Turkey, Quail

RAY'S ReMIX

Winter Peas, Oats, Triticale, Clover, Vetch, Ryegrass, Turnips, Radish

Hearty winter mix for deer and turkey. Suitable for all soil types and great for improving soil health as well. This is a great late fall to early winter plot mix to provide forage options later in the season and harsher winter months.

PLANTING DATE: October - December
***PLANTING RATE:** 50 lbs./acre - 80 lbs./acre
TARGET SPECIES: Deer, Turkey

OTHER KEY SINGLE SPECIES OFFERINGS

Forage Wheat: Deer, Dove, Quail, Turkey

Forage Oats: Deer, Dove, Quail, Turkey

Clover: Deer, Turkey

Winter Peas: Deer, Turkey

Brassicas: Deer, Turkey

***If you are drilling or using a planter, refer to the lower end of the recommended planting rate. If you are broadcasting or top sowing, refer to the higher end of the planting rate.**

CUSTOM BLENDS

We understand that no one knows your land better than you do. It's why we're committed to providing the best options available, whether that's one of our existing mixes/blends or one designed just for you to help meet your specific goals. Because we blend our mixes in-house, we're capable and ready to create a mix customized for you and your land.

To get more information on creating a custom blend, please reach out to Ray Richburg at ray@mixonseed.com.
