

SLW DOUBLE A MIX

- Aeschynomene and Alyceclover mix
- Warm-season legumes for a good source of summer forage for deer
- Both require inoculation at planting to ensure nitrogen fixation
- Heavy browse resistance after establishment
- Also creates brood-rearing habitat for quail and turkey

Planting Date: April to June

Planting Rate: 20 to 30 lbs./acre

Planting Depth: 1/4 to 3/4 inch

Preferred Soil Type: Sandy loam to clay

Game Species: Deer, Turkey, Dove, Quail
